# A LEGACY OF CULINARY PERFORMANCE

For more than fifty years, Read Woodfiber Laminate Cutting Boards™ have been the choice of professional kitchens and thousands of restaurants, large and small, worldwide. When Read introduced its innovative new boards in 1962, nothing could match their durability and functionality. They can last many times longer than other materials, resist deep knife cut marks while still protecting a chef's treasured knives and resist heat and stains. Because the material is tough enough to stand up to steam cleaning and harsh, sanitizing commercial dishwashers, they can help prevent the spread of food-borne illnesses.

In a restaurant kitchen, everyone and every tool must pull its own weight. That's why, after fifty years, Read is still the leader in food prep and cutting surfaces for the commercial food industry, and there's still nothing that can match a Read Products Woodfiber Laminate cutting board.

# WOODFIBER LAMINATE CUTTING BOARDS

Read Products Woodfiber Laminate cutting boards are the original. Used in commercial kitchens for more than fifty years, they're made from sheets of natural wood fibers that are impregnated with resin and heat pressed to thickness. The result is a cutting board with unmatched durability and performance.

They're hygienic and easy to clean because they are not destroyed by knives and stay smoother than other boards. They are long lasting and safe for your finest knives.

## **Lifetime Guaranteed**

See Lifetime Guarantee in Terms and Conditions.

## **Hygienic and dishwasher safe**

Our material is listed by the National Sanitation Foundation (NSF International). Our products are nonporous and won't harbor bacteria. They are dishwasher safe and can withstand cleaning agents, including solutions containing bleach.

## **Heat Resistant**

Our boards withstand temperatures of up to 350 degrees F and can be used as a trivet for hot pans. However they should not be used in ovens or microwaves.

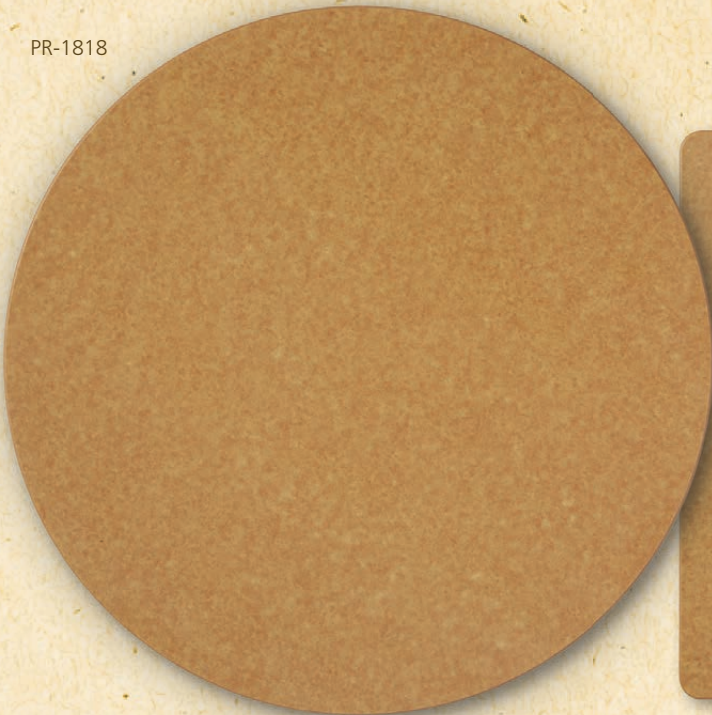

## **Gentle on Knives**

Our material is dense enough to prevent damaging the board by cutting into it, but not so dense as to damage your knife's edge.

## **Renewable**

After extensive use, boards can be dressed with a scraper or lightly sanded to renew surface.

PR-1818

## **Reversible**

Both sides can be used as a cutting surface.

## **Longer Lasting**

Our boards outlast wood and white plastic (HDPE).

## **Made in the USA**

We manufacture all our Woodfiber Laminate products in Seattle, WA from raw materials made in the USA.

## **Eco-Friendly FSC**

Made with natural wood fibers that FSC (Forest Stewardship Council) tracks from the forest to our factory. FSC certification ensures that products come from well-managed forests which provide environmental, social and economic benefits.

## **Greenguard**

GREENGUARD Certification ensures that a product has met some of the world's most rigorous and comprehensive standards for low VOC emissions.

## **Rainforest Alliance**

By choosing Rainforest Alliance Certified™ products, you support long-term environmental, social and economic sustainability.
