IMC TEDDY SHELVING

All shelving is ideal for large institutional, commissary or facility applications where equipment abuse is likely. Shelving withstands heaviest loads with years of maintenance-free use. All shelving is constructed from Type 300 Series stainless steel. Posts are 1 5/8" OD tubes, 16GA S/S with caps & adjustable S/S feet.

Solid surface design provides easy access and quick clean up of spills. Large louvers allow uniform temperature distribution.

Stationary units provided with stainless steel posi-grip adjustable foot inserts. Mobile units provided with 5" casters. Easily assembled and adjusted.

Contact your representatives or the factory for more information, to request a quote or to purchase our products.

IMC is a Consultant/Designer driven manufacturer of Food Service Equipment. We welcome product recommendations and upgrade suggestions from you. Our mission is to introduce new and innovative products in food service equipment and storage/handling systems.

IMC only uses 300 series stainless steel which is recommended for high corrosion resistance and uniformity of finish. Every IMC product will perform its intended function even in the most punishing work environment.

Production begins with Laser and CNC machine work and the final product is polished to a #4 brushed satin finish. The finish has the ability to hide and blend scratches for many years. Each product is then carefully inspected and protected for delivery to the customer.
