STELLA EPIC
INFUSED WITH EPIC FEATURES.

For operators looking for a state-of-the-art espresso machine that combines power, precision, and performance, look no further than the Stella Epic from UNIC. The STELLA EPIC offers a wealth of technical features that make it both powerful and intuitive to use. From integrated temperature stability and a sophisticated pre-infusion system to the Easylock Brew Group and more, the STELLA EPIC provides users with the tools to refine their coffee journey.

Integrated Temperature Stability
• Ensures high quality, consistent extractions through dispensed shots from the boiler, directly to the cup.
• No heat is lost as with competitive machines that often engineer group systems separate from the boiler.

Thermalink Power
• Heats faster and ensures more control using power management and larger heating elements for the steam and boilers.
• Automatically monitors the demand and selectively applies power to each individual heating element as needed.

Pulse Profiling
• Superior extraction and maximum control.
• Allows the operator to oversee the turbulence and time of the extraction cycle at every interval.
• Amplifies the artistry of espresso, helps expose coffee's most delicate attributes.

Easylock Brew Group and Steamglide lever
• Ensures continued optimum performance.
• Patented system reduces stress on machine, utilizes a moveable piston assembly that drops down to make a seal when the group is activated.
• SteamGlide Lever simplifies the lever action to an effortless slide.
• Greatly reduces operator fatigue and potential for injury.

Technical features

	Stella Epic 2	Stella Epic 3
Width	31 1/8"	38 9/16"
Depth	26 7/8"	26 7/8"
Height	20 3/16"	20 3/16"
Weight	198 lbs	220 lbs
Boiler Capacity / Power	8.9 L / 6000 W	14.3 L / 6000 W
Coffee boiler capacity / Power	2 x 1.65 L / 2000 W	3 x 1.65 L / 2000 W
Total Power	6500 W (Single) / 30 Amps	6500 W (Single) / 30 Amps
Voltage	220 V (Single) / 60 Hz	220 V (Single) / 60 Hz
